Holds up!

These get the job done! I always get nervous trying new tools because I don't want to break them! These withstood the task and exceeded my expectations! They were compatible with my adapters for my impact. Could use them wherever you need and be ok. My favorite thing about this set is that they clip into their correct position in the case. I am notorious for dropping or dumping my tools. The clip in gives me peace of mind that I won't have to chase them all down. Has a nice little measuring on the back of the case as an extra benefit.
